PREPRINTS

[18] BILDHAUER, M.; NAUMANN, J.; WOLF, J.: *An approximation theorem for vector fields in BD_{div}.* www.math.uni-sb.de/service/preprints/preprint311.pdf

[17] NAUMANN, J.; WOLF, J.: *On the existence of weak solutions to a coupled system of two turbulent flows.* www2.mathematik.hu-berlin.de/publ/pre/2010/P-10-12.pdf

[16] DRUET, P.-E.; NAUMANN, J.; WOLF, J.: *A Meyers' type estimate for weak solutions to a generalized stationary Navier-Stokes system.* www2.mathematik.hu-berlin.de/publ/pre/2008/P-08-06.pdf.

[15] NAUMANN, J.; SIMADER, C.: *Measure and Integration on Lipschitz-Manifolds.* www2.mathematik.hu-berlin.de/publ/pre/2007/P-07-15.pdf.

[14] NAUMANN, J.: *Transformation of LEBESGUE measure and integral by LIPSCHITZ mappings.* www2.mathematik.hu-berlin.de/publ/pre/2005/P-05-8.pdf.

[13] NAUMANN, J.: *Remarks on the prehistory of Sobolev spaces.* https://www2.mathematik.hu-berlin.de/publ/pre/2002/P-02-2.ps.

[12] NAUMANN, J.; WOLFF, M.: *A global L^p-estimate on weak solutions of nonlinear parabolic systems under mixed boundary conditions.* https://www2.mathematik.hu-berlin.de/publ/pre/1995/p-95-2.ps.

[11] NAUMANN, J.; WOLFF, M.: *Interior integral estimates on weak solutions of nonlinear parabolic systems.* https://www2.mathematik.hu-berlin.de/publ/pre/1994/p-94-12.ps.

[10] NAUMANN, J.: *On the existence, uniqueness and interior regularity of weak solutions to the stationary drift-diffusion equations in semiconductor theory.* Vorlesungsreihe no. 27, SFB 256, Univ. Bonn 1993.

[9] NAUMANN, J.; SCHMIDTMANN, O.: *On the existence of weak solutions of the stationary semiconductor equations.* Preprint nr. 92-7, Fachber. Mathematik, Humboldt-Univ. Berlin 1992.

[8] NAUMANN, J.: *On the convergence of iteration schemes for steady state semiconductor calculation.* SFB 256, Math. Inst., Univ. Bonn, preprint no. 130 (1990).

[7] NAUMANN, J.; WOLFF, M.: *A global L^q-gradient estimate on weak solutions of nonlinear elliptic systems.* Dip. Mat. Univ. Catania (rapporto interno, 18. 02. 1991) (19 pp.).https://www.math.hu-berlin.de/~jnaumann/web/publ/publ_link/catania.febbr.1991.PDF

[6] NAUMANN, J.: *On some integral estimates on weak solutions of the non-stationary Stokes system.* Dip. Mat. Univ. Catania (rapporto interno, 22.11.1989) (14 pp.)

[5] Ivert, P.-A.; Naumann, J.: *Higher integrability by reverse Hölder inequality (the parabolic case).* Dip. Mat. Univ. Catania (rapporto interno (1988)) (30 pp.).`https://www.math.hu-berlin.de/~jnaumann/web/publ/publ_link/Ivert.Nau.Catania.pdf`

[4] Naumann, J.: *On the interior regularity of weak solutions of the stationary Navier-Stokes equations.* Dip. Mat. Univ. Pisa, report no. 156 (1986).

[3] Naumann, J.: *On regularity of the solutions to the variational inequality of stationary visco - plastic fluid motion.* Dep. Math. Linköping Univ., report LiTh-MAT-R-86-01 (1986).

[2] Naumann, J.: *On variational principles in perfect plasticity.* Preprint P-Math.-10/81, May 1981, Akad. Wiss. DDR, Inst. f. Math.

[1] Naumann, J.: *On the minimum problem for the warpening function in the elastic-plastic torsion of a cylindrical bar.* Preprint P-Math.-08/81, March 1981, Akad. Wiss. DDR, Inst. f. Math.
