

## Instructions for authors

The Elemente der Mathematik favor publications of the following kind:

- surveys on important developments in mathematics and its applications,
- stimulating expositions of more specialized mathematical problems and subjects,
- reports on mathematical progress and new mathematical methods and applications in other sciences.

Apart from the choice of subjects, the quality of presentation will decide on the suitability of an article for publication in the journal. Without restriction, we endorse the advice given in this context by Mathematics Magazine: "Say something new in an appealing way, or say something old in a refreshing way. But say it intelligibly, presuming a minimum of technical vocabulary". A clear and lively style appropriate for the intended audience will substantially further the understanding of the subject matter.

New problems should be submitted together with a solution, and of course should not be offered to another journal simultaneously.

Please send manuscripts in German, French, English, or Italian to:
